This editorial presents the papers of the fifth issue of the seventh volume of the Revista Brasileira de Planejamento e Desenvolvimento - Brazilian Journal of Planning and Development (RBPD). This number brought contributions to the planning and development in Brazil and in Cuba, specific in sustainable development.

This issue have 8 articles, four of which analyze sustainable development in Brazil and four in Cuba. Among the topics analyzed are the fiscal incentive to sustainability, indicators of sustainability and family agriculture.

We would like to thank the contribution of all the authors and evaluators of our journal. Introducing the articles of this issue, we wish a great and profitable reading to all !!!
